PROFESSIONAL SUMMARY

Computer Science Junior at Misr International University with hands-on experience in Odoo ERP development, module customization (Python, XML, PostgreSQL), and backend business logic execution. Proficient in Java, C++, Python, and SQL, with a solid foundation in OOP, data structures, and database design. Passionate about leveraging software engineering principles and database optimization to build scalable enterprise solutions as an Odoo Developer.

EXPERIENCE

Kraft Wear 2025 – Present

Co-Founder & Shopify Developer

- **Shopify Development:** Build and maintain the Shopify storefront, including catalog sync with sales channels, product listings, and abandoned checkout recovery flows.
- **Quality Control & Fulfillment:** Oversee Cash-on-Delivery (COD) order tracking and reconciliation, and manage quality control across product listings and fulfillment for the Egyptian market.
- **Creative Production & Automation:** Built an AI-assisted content pipeline (Higgsfield, Seedance, CapCut) alongside a custom Python/Pillow image-compositing workflow for pixel-accurate logo placement reducing manual design turnaround.

FlexCode Systems Jun – Aug 2026

Odoo Developer Intern

- **Odoo Development & Customization:** Developed and customized Odoo ERP modules using Python, XML, and PostgreSQL, designing tailor-made Form, Tree, and Kanban views alongside QWeb reports.
- **Feature Delivery & Optimization:** Collaborated with senior engineers to implement business logic, debug existing code, and optimize database queries across core Odoo applications.
- **Data Migration & Cleansing:** Led large-scale contact deduplication and data cleansing efforts (analyzing 3,000+ duplicate record groups) using Python/pandas, improving data integrity ahead of CRM go-live.
- **CRM Implementation:** Supported end-to-end CRM implementation for a client project, including scope definition, change management (via structured change registers), and cross-functional coordination with client-side technical stakeholders.
- **Automation & Data Governance:** Configured automated data recycling and archival rules to maintain database hygiene and reduce stale record buildup.
- **Troubleshooting & Debugging:** Diagnosed and resolved build-level warnings and model inheritance issues (e.g., recursive field declarations) to maintain deployment stability on Odoo.sh.

Commercial International Bank (CIB) May 2026

Summer Intern – Generative AI & Banking

- **Emerging Technologies:** Explored practical applications of generative AI and modern fintech tools within commercial banking workflows.
- **Banking Knowledge & Strategy:** Participated in training on core banking operations, emerging financial technologies, and future-focused financial skills.

Tickets Marche 2022 – 2025

Team Leader

- Coordinated on-ground operations for 10+ live events, managing attendee flow and venue logistics for crowds of 500+ attendees.
- Monitored ticket scanning systems across multiple entry points, coordinating with the technical team to minimize gate disruptions during live events.
- Contributed to post-event reporting by documenting operational issues, attendee feedback, and improvement recommendations across 3 years of events.

EDUCATION

Misr International University 2024 – Present

Bachelor of Computer Science

Modern Language School Graduated 2024

Thanawia Amma

ACADEMIC PROJECTS

E-Commerce Website | HTML, CSS, JavaScript, Node.js, MongoDB

Built a full-stack e-commerce web application with responsive frontend and backend integration. Implemented product listings, cart functionality, and basic user authentication.

Computer Networks Enterprise Project | Cisco Packet Tracer (MIU)

Built a multi-site enterprise network featuring VLANs, OSPF/EIGRP redistribution, NAT/PAT, and site-to-site IPsec VPN, plus DNS, Web, Email, and wireless services, fully tested end to end.

Recruitment Management System | Java

Designed and implemented a Java-based recruitment system using OOP principles, with role-based logic and data handling to manage candidates and recruitment workflows.

Graph Traversal Engine | C++

Built a graph traversal engine implementing BFS and DFS with adjacency matrices, analyzing time complexity and traversal efficiency for different graph sizes.

MIU GPA Calculator | C++

Developed a GPA calculator to compute student GPA based on course credits and grades, applying conditional logic, loops, and input validation.

LANGUAGES AND SKILLS

- Languages: Arabic (Native), English (Excellent)
- Programming: Java, C++, Python, PHP
- ERP & Platforms: Odoo (ORM, QWeb, Odoo.sh), Shopify
- Databases: PostgreSQL, SQL & Database Design
- Web Development: HTML, CSS, JavaScript, XML, Node.js
- Concepts: OOP, Data Structures & Algorithms, Problem Solving
- Tools: Git, GitHub
